-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 11-7-2003 has been considered by the examiner.

### ***Specification***

3. A substitute specification excluding the claims is required pursuant to 37 CFR 1.125(a) because the specification contains errors far too numerous to amend without a complete revision of the entire specification. Initially, the Examiner points out that the specification is replete with grammatical and idiomatic errors that require careful review and revision of the specification. Additionally, the section of the specification referring to the Japanese prior art documents does not correctly correspond the numerals and Figure denotations of the references in the instant specification. If the prior art is to be referred to in the specification, care should be utilized when referring to Figures, reference numerals and the associated teachings of that prior art. The specification needs to be amended in this area in view of the improper matching of Figure description numbers.

Art Unit: 1756

4. A substitute specification must not contain new matter. The substitute specification must be submitted with markings showing all the changes relative to the immediate prior version of the specification of record. The text of any added subject matter must be shown by underlining the added text. The text of any deleted matter must be shown by strike-through except that double brackets placed before and after the deleted characters may be used to show deletion of five or fewer consecutive characters. The text of any deleted subject matter must be shown by being placed within double brackets if strike-through cannot be easily perceived. An accompanying clean version (without markings) and a statement that the substitute specification contains no new matter must also be supplied. Numbering the paragraphs of the specification of record is not considered a change that must be shown.

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The scope of the claims does not particularly point out the subject matter in a clear and concise way. Specifically, claims 1 and 7 recite "between adjacent two of said

patterns". This phrase is unclear and the claims should be amended in such a way as to allow one of skill the ability to easily determine the intended scope of the invention.

***Allowable Subject Matter***

7. Claims 1-11 are allowable over the prior art of record. None of the prior art references describes, teaches or suggests the limitation, as claimed, of determining the gap size in a middle region of the substrate. The prior art only refers to the edges and corners.

8. The claims are still rejected as set forth in paragraph number 5 above.

***Conclusion***

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher G. Young whose telephone number is 571-272-1394. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
